SentinelAI — Team Details & Profiles

Team SentinelAI · VIT-AP University · July 2026

Member 1 — Saatwik Sairaam Vasamsetti

Co-Founder · Product & Engineering

Full name	Saatwik Sairaam Vasamsetti
Degree / Branch	Integrated M.Tech — Computer Science & Engineering (5-year)
College & Batch	VIT-AP University, Batch 2024–2029
Email	saathwik.13@gmail.com
GitHub	https://github.com/saatwik-1157

Profile. Full-stack developer with multiple shipped projects: PathAhead (a career-guidance platform with generated learning roadmaps, PWA and accessibility-audited), an educational ML stock-prediction system (scikit-learn + dashboard), and several production-grade static web platforms. Comfortable across Python ML tooling, Node.js, and vanilla-JS frontends.

Role in SentinelAI. Owns the technical build: edge AI models (YOLO/TinyML), multi-sensor fusion logic, the React dashboard, and the alert pipeline.

Member 2 — Sai Nirisha Chowdary Pavuluri

Co-Founder · Research & Strategy

Full name	Sai Nirisha Chowdary Pavuluri
Degree / Branch	Integrated M.Tech — Computer Science & Engineering (5-year)
College & Batch	VIT-AP University, Batch 2024–2029
Email	nirishapavuluri@gmail.com

Profile. Originator of the SentinelAI concept — authored the full vision document covering problem framing, system design, market analysis, business model, SDG mapping and candidate patent areas. Deep technical foundation: implemented a working GPT (transformer, autograd, training loop) from scratch in pure Python + NumPy.

Role in SentinelAI. Owns stakeholder validation (police, 108 operators, municipal officials), the business model, partnerships, and IP strategy.

Advisors & Validation Network (Phase 1 targets)

Police-department mentor	Outreach planned — name added when confirmed
108 / EMRI operations contact	Outreach planned — name added when confirmed
Municipal smart-city officer	Outreach planned — name added when confirmed
Faculty advisor (embedded systems / AI), VIT-AP	Outreach planned — name added when confirmed

Why this team

- **Complementary split** — one founder builds, one founder validates and sells; no overlap, no gaps for a two-person prototype-stage team.
- **Shipped-product track record** — both members have completed, working projects rather than only coursework.
- **Domain commitment** — the concept was developed bottom-up by the team, not adopted from a problem-statement bank.
